# Horizontal Axis Wind Turbines

## Air-X 400 watt wind generator, 12V

**Introducing** the latest evolution in small wind turbines. The AIR-X wind generator builds upon what made AIR the world's #1 selling small wind turbine with new technology previously found only in today's state-of-the-art mega-watt-class wind turbines. All of these features are primarily found within the body of the turbine. The new microprocessor based speed control results in increased performance, improved battery charging capability and the reduction of “flutter” noise from the ...

**List Price: \$915.00**

**Our Price: \$795.00 per Each**

## Air-X 400 watt wind generator, 24V

**Introducing** the latest evolution in small wind turbines. The AIR-X wind generator builds upon what made AIR the world's #1 selling small wind turbine with new technology previously found only in today's state-of-the-art mega-watt-class wind turbines. All of these features are primarily found within the body of the turbine. The new microprocessor based speed control results in increased performance, improved battery charging capability and the reduction of “flutter” noise from the ...

**List Price: \$915.00**

**Our Price: \$795.00 per Each**

## Air-X 400 watt wind generator, 48V

**Introducing** the latest evolution in small wind turbines. The AIR-X wind generator builds upon what made AIR the world's #1 selling small wind turbine with new technology previously found only in today's state-of-the-art mega-watt-class wind turbines. All of these features are primarily found within the body of the turbine. The new microprocessor based speed control results in increased performance, improved battery charging capability and the reduction of “flutter” noise from the ...

**List Price: \$915.00**

**Our Price: \$795.00 per Each**

## Air-X marine 400 watt, 12 volt wind

**Introducing** the latest evolution in small wind turbines. The AIR-X wind generator builds upon what made AIR the world's #1 selling small wind turbine with new technology previously found only in today's state-of-the-art mega-watt-class wind turbines. All of these features are primarily found within the body of the turbine. The new microprocessor based speed control results in increased performance, improved battery charging capability and the reduction of “flutter” noise from the ...

**List Price: \$1,145.00**

**Our Price: \$995.00 per Each**

## Air-X marine 400 watt, 24 volt wind

**Introducing** the latest evolution in small wind turbines. The AIR-X wind generator builds upon what made AIR the world's #1 selling small wind turbine with new technology previously found only in today's state-of-the-art mega-watt-class wind turbines. **List Price: \$1,145.00**

**Our Price: \$995.00 per Each**

### **AIR INDUSTRIAL 400 watt, no regulator**

Regardless of the environment or application, Southwest Windpower has the wind turbine that can meet your needs. From offshore to mountain tops to global expeditions, the AIR Industrial is sure to keep your batteries charged. Minimize down times and reduce operating costs with an AIR Industrial wind turbine. Based on the world's best selling wind turbine, the AIR Industrial has been designed to survive the harshest mountain-top and offshore sites.

When the AIR Industrial is ...

**List Price: \$995.00 per Each**

### **Air Breeze 200W wind generator, 12VDC**

The Air Breeze is designed to make it simple for the user to site and install. If you have a wind resource greater than 8mph (4 m/s) and your area is free from obstacles then a wind generator will likely be a good match. A hybrid system that uses both solar photovoltaic panels and a wind turbine will make the perfect compliment that provides minimal interruptions in power. The Air Breeze charge batteries with an output of 30kWh a month in an average wind condition of 12 MPH.

**List Price: \$999.99**

**Our Price: \$870.50 per Each**

### **Air Breeze 200W wind generator, 24VDC**

The Air Breeze is designed to make it simple for the user to site and install. If you have a wind resource greater than 8mph (4 m/s) and your area is free from obstacles then a wind generator will likely be a good match. A hybrid system that uses both solar photovoltaic panels and a wind turbine will make the perfect compliment that provides minimal interruptions in power. The Air Breeze charge batteries with an output of 30kWh a month in an average wind condition of 12 MPH.

**List Price: \$999.99**

**Our Price: \$870.50 per Each**

### **Air Breeze marine 200w wind gen, 12VDC**

The Air Breeze is designed to make it simple for the user to site and install. If you have a wind resource greater than 8mph (4 m/s) and your area is free from obstacles then a wind generator will likely be a good match. A hybrid system that uses both solar photovoltaic panels and a wind turbine will make the perfect compliment that provides minimal interruptions in power. The Air Breeze charge batteries with an output of 30kWh a month in an average wind condition of 12 MPH.

**List Price: \$1,262.70**

**Our Price: \$1,098.50 per Each**

### **Air Breeze marine 200w wind gen, 24VDC**

The Air Breeze is designed to make it simple for the user to site and install. If you have a wind resource greater than 8mph (4 m/s) and your area is free from obstacles then a wind generator will likely be a good match. A hybrid system that uses both solar photovoltaic panels and a wind turbine will make the perfect compliment that provides minimal interruptions in power. The Air Breeze charge batteries with an output of 30kWh a month in an average wind condition of 12 MPH.

**List Price: \$1,262.70**

**Our Price: \$1,098.50 per Each**

### Bergey Excel 7.5 kW wind turbine 48VDC

The BWC EXCEL is a modern 7 meter (23 ft) diameter, 10,000W wind turbine designed for high reliability, low maintenance, and automatic operation in adverse weather conditions. It is available in three configurations: battery charging, water pumping, and grid-connected. The BWC Excel is a ruggedly built turbine that comes with the longest warranty (5 years) in the industry.

Battery charging BWC EXCEL's can be supplied with outputs of 24, 48, 120 or 240

**List Price: \$26,345.00 per Each**

### Bergey Excel 10 kW wind turbine

The BWC EXCEL is a modern 7 meter (23 ft) diameter, 10,000W wind turbine designed for high reliability, low maintenance, and automatic operation in adverse weather conditions. It is available in three configurations: battery charging, water pumping, and grid-connected. The BWC Excel is a ruggedly built turbine that comes with the longest warranty (5 years) in the industry.

Battery charging BWC EXCEL's can be supplied with outputs of 24, 48, 120 or 240

**List Price: \$32,200.00 per Each**

### Bergey XL.1 24 VDC wind turbine

With a rotor diameter of 2.5 meters (8.2 ft) and a peak output of approximately 1,600 watts the XL.1 is intended for the off-grid home market in North America and for rural electrification programs in developing countries. It is also a perfect upgrade system for current owners of micro-turbines, such as the Air 303 or 403.

The XL.1 combines a number of advanced technical features, including a completely new airfoil (patent pending), to provide the highest efficiency yet achieved in a ...

**List Price: \$2,999.50 per Each**

### Skystream 3.7 1.8 KW Grid Tie Wind Generator

**Southwest Windpower Skystream 3.7** The Skystream 3.7 is a new generation wind generator that hooks up to your home to reduce or eliminate your monthly electric bill. It's the first all-inclusive wind generator (with control and inverter built-in) designed to provide quiet, clean electricity in very low winds. This makes the Skystream ideal for residential homes and small businesses.

Skystream is available on towers ranging from 35' (10.67m) to 110' (33.5m).

**List Price: \$6,327.50 per Each**

### Whisper 100, 900 watt, 12-48 VDC wind Generator

**Whisper 100 Land Wind Generator w/multi voltage charge controller**

Whisper 100 - is designed to operate in a site with medium to high wind speed averages of 12 mph, 5.4 m/s, and greater. The Whisper 100 provides 100+ kWh per month, 3.4 kWh per day, in a 12 mph average wind speed location. The Whisper 100, with its 7 ft. (2.1m) rotor diameter and 40 sq. ft. swept area, is rugged enough for extreme environments. The redesigned Whisper 100 turbine incorporates a permanent magnet ...

**List Price: \$2,622.00 per Each**

## Whisper 200 High Voltage Wind Generator

Southwest Windpower's Whisper 200 High Voltage Wind Turbine is 220V with optional Whisper Multi voltage Charge Controller & optional transformer. Default is 24VDC, can be configured for 12 or 48VDC.

The Whisper 200 High Voltage has an all-new look featuring a cast aluminum frame and smooth, quiet operation of the patented "angle-governor" furling design.

The bigger brother to the Whisper 100, the Whisper 200 features a 10 ft (3.1m) rotor diameter and an 80 sq. ft. swept area that ...

**List Price: \$3,058.73 per Each**

## Whisper 200,1000 watt, 12-48V w/ control

### Whisper 200 Land Wind Generator w/multi voltage charge controller

Whisper 200 -is designed for the user located in low to moderate wind speed averages (less than 12mph, 5.4m/s).

The bigger brother to the Whisper 100, the Whisper 200 features a 10 ft (3.1m) rotor diameter and an 80 sq. ft. swept area that provides the user with greater output at low wind speed averages. The Whisper 200 has twice the swept blade area, providing double the potential energy as compared to the ...

**List Price: \$3,123.80 per Each**

## Whisper 500, 3kW, 24 VDC wind turbine

### Whisper 500 Ez Wire Wind/Control 24v

Serious power from a medium size small wind turbine. The Whisper 500 can produce enough energy to power an entire home. Formerly the Whisper 175, the Whisper 500 was completely redesigned in 2004 to work in harsh high wind environments. The Whisper 500 is a two bladed fiberglass reinforced blade and incorporates the patented side furling design that optimizes output at any wind speed. Assuming a 12 mph (5.4 m/s) wind, a Whisper 500 will produce as

**List Price: \$7,885.00 per Each**

## Whisper 500, 3kW, 48 VDC wind turbine

### Whisper 500 Ez Wire Wind/Control 48v

Serious power from a medium size small wind turbine. The Whisper 500 can produce enough energy to power an entire home. Formerly the Whisper 175, the Whisper 500 was completely redesigned in 2004 to work in harsh high wind environments. The Whisper 500 is a two bladed fiberglass reinforced blade and incorporates the patented side furling design that optimizes output at any wind speed. Assuming a 12 mph (5.4 m/s) wind, a Whisper 500 will produce as

**List Price: \$7,885.00 per Each**

## Whisper 500, 3kW, 220V,wind turbine

### Whisper 500 220V 3-phase power transmission with controller and diversion load

Serious power from a medium size small wind turbine. The Whisper 500 can produce enough energy to power an entire home. Formerly the H-175, the Whisper 500 was completely redesigned in 2004 to work in harsh high wind environments. The Whisper 500 is a two bladed fiberglass reinforced blade and incorporates the patented side furling design that optimizes output at any wind speed. Assuming a 12 mph (5.4 ...
